## Designer flush plates by Lucie Koldová

### Purity and clear direction

Lucie Koldová is a significant personality in the Czech design. She creates original furniture, lighting, objects and spaces with a specific atmosphere. Now she has joined Alca to create a series of designer flush plates called Linka and Dot.Dot.

The dominant element of both flush plates is the ripple. It was inspired by a stream of flowing water. "This element combines simplicity with a story. The emphasis on details, which is reflected in the gentle rounding and minimalism, transforms an ordinary flush plate into a user friendly and at the same time aesthetic piece," Lucie Koldová describes the idea.

video

## Flush plates Linka

### Strict line softened by the ripple

The flush plate is inspired by the shapes and lines of modern architecture. At first glance, it looks ultimate and uncompromising. But the round shape of the ripple softens the overall expression and the flush plate thus makes the impression of kindness and balance.

### Blend in with the wall or let it stand out

Whatever the requirements, in the wide range of color variants you will find a solution for every space. In addition, the Linka flush plates are so thin that they blend in with the tiling.

Anti-fingerprint

## Flush plates Dot.Dot.

### The circle as a symbol of perfection

Simplicity and efficiency are the two aspects of the Dot.Dot flush plate. The traditional symbol of a circle highlighted by an elegant wave represents the story of flowing water. And in addition, it will look absolutely amazing in the bathroom.

### A game of contrasts

Four color variants will suit every bathroom. Minimalist look gives the flush plate in the single-color version an even sculptural character. On the other hand, the contrast between minimalist black and distinctive gold will add courage and elegance to any room.
